

Scientific and methodological center of informational and analytical implementation of the higher educational establishments activity “Agroosvita”

The “Agroosvita”
has the coordinative
function and provides
scientific and
methodological support to
agrarian high schools

The main directions of the activity of SMC “Agroosvita”

The innovation process in agricultural education:

- ✓ **Creation of the big educational centers, technology parks, business incubators (education, science, production);**
- ✓ **The students knowledge monitoring as element of improvement in quality the educative process and definition of university rating**
- ✓ **Creation of the scientific practical centers based on the modern agricultural enterprises;**
- ✓ **Creation of the collaborating chain “Education – Science- Production”**
- ✓ **Practical training of the university teachers at the modern agricultural enterprises;**

The innovation process in agricultural education:

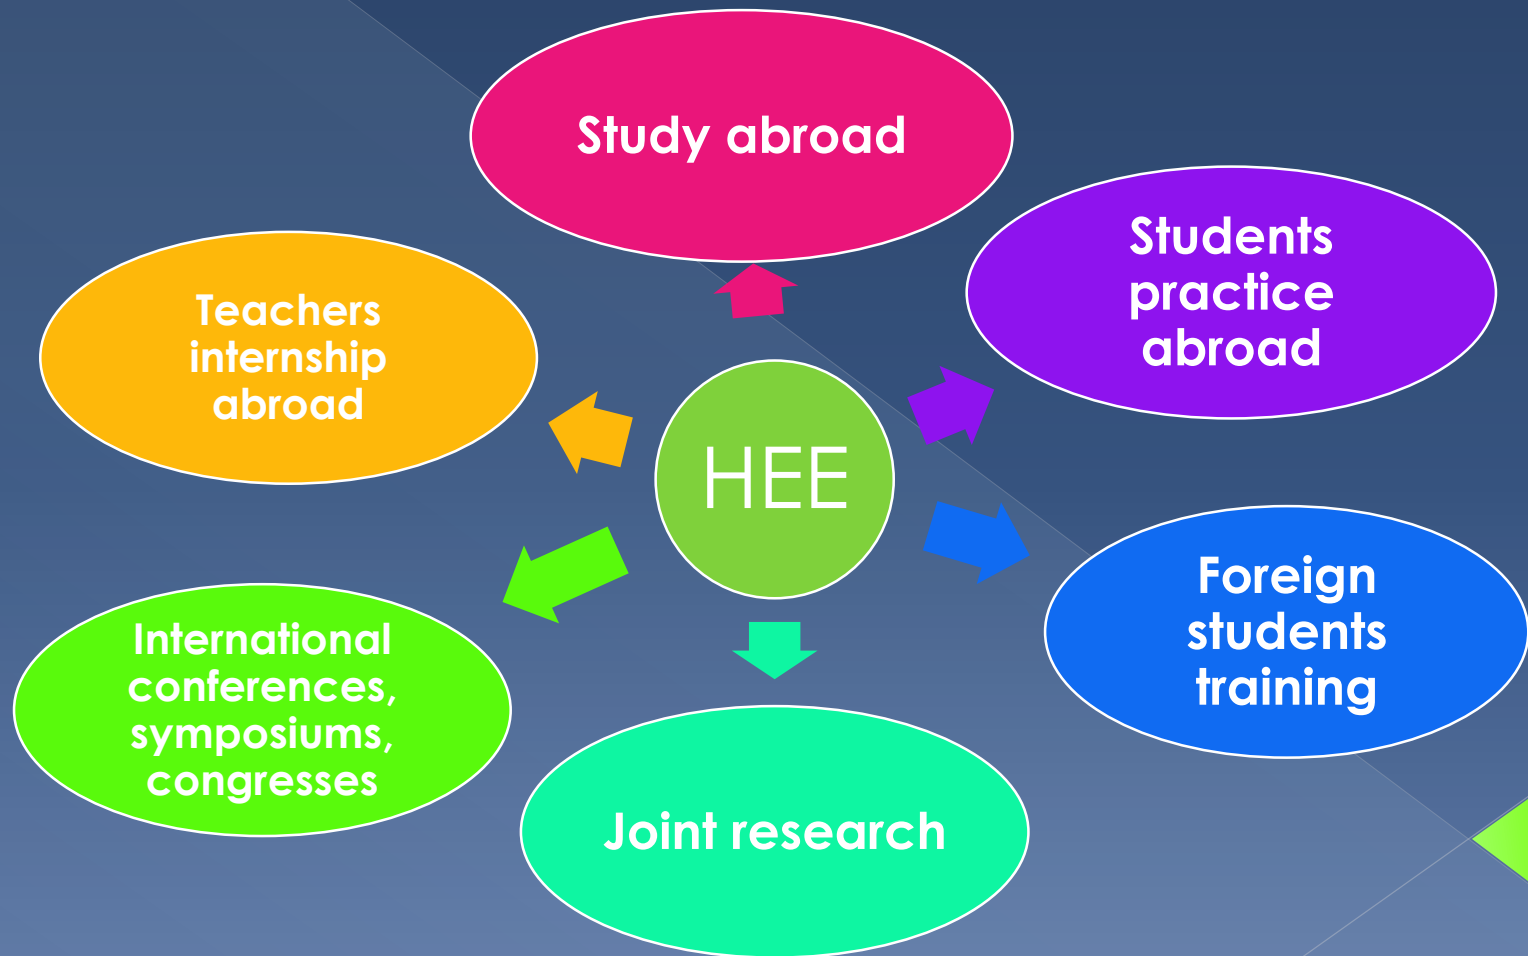

- ✓ **Development of the post-qualifying education according to the principle “demand determines supply”;**
- ✓ **The development of the complex methodological support for more effective training of students;**
- ✓ **Elaboration of new plans of instruction with more practical lessons;**
- ✓ **Supporting the teachers and scientists with consulting services;**
- ✓ **Supporting the rural sustainable development;**

We try to make contacts with academic institutions and research establishments for the realization the international scientific joint projects

The main directions of the international activity in agrarian higher educational establishments of Ukraine

“Agroosvita” tries to engage the higher educational establishments to participation in different projects

Ukrainian students have the possibility to study according to the double degree programmes

Many students of Ukrainian universities and colleges can obtain the double diplomas and European diplomas.

The partnership relations are very important for international cooperation

Many Ukrainian universities and colleges have the partners in different countries. The example is the partnership between the agricultural college of Berdiansk and French winemaking college in Liburn-Montagne.

French students visit Ukraine

- We organize the visits for foreign students and teachers to Ukraine and Ukrainian students to different European countries.

We organize the international events, like seminars, conferences, exhibitions for the purpose of popularization abroad the Ukrainian agrarian education and Ukrainian agriculture in general.
